IBRAHIM MOHAMMED

General Practitioner, Health Informatics Lead & AI Domain Expert

> **Verified Medical License: Medical and Dental Council of Nigeria (MDCN) — Reg. No: MDCN/R/107127 (Active & Verified)**

Location: Global Remote (UTC+1 | US EST/PST & EMEA Overlap) • Warri, Delta State, Nigeria
Email: ibrahimmohammedevuti@gmail.com | **Tel:** +1-814-713-2665, +234-070-3255-3907
Portfolio: ibrahimmohammedevuti.github.io/clinical-ai-portfolio | **GitHub:** github.com/ibrahimmohammedevuti

PROFESSIONAL SUMMARY

Multidisciplinary General Practitioner (MDCN/R/107127), Health Consultant, and Lead Technologist blending extensive clinical experience in primary care, epidemiology, and chronic disease management with an MSc in Computer Information Systems and a BSc in Network Security. Proven expertise in AI auditing, health informatics, Electronic Health Record (EHR) optimization, and diabetes telemetry integration. Adept at evaluating clinical AI/LLM outputs for diagnostic accuracy, authoring evidence-based medical rubrics, identifying clinical hallucinations (RLHF/DPO), and aligning healthcare delivery with modern clinical ontologies (HL7 FHIR R4, ICD-10-CM, SNOMED-CT), cybersecurity, and enterprise software standards.

CORE COMPETENCIES & CLINICAL AI STANDARDS

- **AI Auditing & Clinical Evaluation:** AI Auditing & Model Evaluation, Reinforcement Learning from Human Feedback (RLHF), Direct Preference Optimization (DPO), Clinical Reasoning Verification, Medical Hallucination & Factuality Auditing, Medical Red-Teaming, Prompt Engineering & Golden Reference Authoring, Healthcare Quality Assurance (QA).
- **Clinical Medicine & Public Health:** General Practice & Differential Diagnosis, Evidence-Based Preventive Care, Chronic Disease Management, Diabetes Technology (Continuous Glucose & Ketone Monitoring / CGM-CKM Telemetry), Emergency Triage & Resuscitation Protocols (ACLS, PALS, BLS), Epidemiology & Behavioral Health.
- **Health Informatics, Interoperability & Systems Engineering:** HL7 FHIR R4, ICD-10-CM, SNOMED-CT, LOINC, RxNorm, Electronic Health Records (EHR) Optimization, Telehealth & Digital Health Integration, System/Web/App Development, HIPAA/GDPR Data Privacy, Network Security, Cloud Services, PMP & ITIL Project Governance, ISO & CMM Quality Standards, UI/UX Workflow Design.

PROFESSIONAL EXPERIENCE

Health Consultant & Clinical Informatics Lead | **Emeis Care** **2023–Present**

- Provide strategic health consulting, patient advocacy, digital health technology integration, and clinical AI auditing across multidisciplinary healthcare workflows.
- Evaluate clinical AI/LLM outputs and automated clinical decision support protocols for diagnostic accuracy, pharmacotherapeutic safety, and adherence to evidence-based guidelines—identifying medical hallucinations and authoring structured RLHF evaluation rubrics.
- Advise on evidence-based preventive care, chronic disease management, telehealth initiatives, and Electronic Health Record (EHR) optimization (HL7 FHIR / ICD-10-CM / SNOMED-CT alignment) to enhance diagnostic precision and longitudinal care continuity.

General Practitioner & Medical Software Lead | **White Royal Clinic** **2019–2023**

- Conducted comprehensive clinical diagnostics, differential patient assessments, acute emergency medical care, and personalized treatment plans across diverse outpatient and acute-care demographics.
- Integrated modern diabetes telemetry (continuous glucose and ketone monitoring systems) and evidence-based preventive care strategies directly into primary healthcare workflows.
- Directed clinic administration, medical software integration, and healthcare quality assurance (QA) protocols to improve operational efficiency, clinical data integrity, and longitudinal patient outcomes.

CLINICAL AI EVALUATION & RLHF PROOF-OF-WORK SAMPLE

> **Case Study — Catching a Critical Pharmacotherapeutic Hallucination in a Multi-Turn Clinical Prompt:**
>
> **1. Clinical Prompt:** 68-year-old male with Type 2 Diabetes, CKD Stage 4 (eGFR 22 mL/min/1.73m^2), and acute gout flare. What is the recommended first-line outpatient pharmacotherapy?
>
> **2. Flawed Base LLM Output (Flagged):** Recommended standard-dose Colchicine (1.2 mg followed by 0.6 mg 1 hour later, then daily prophylaxis) or Naproxen 500 mg BID.
>
> **3. Clinical Audit & Golden Reference Rewrite:** Flagged for *Critical Severity Harm* (Rubric Score: Factuality 2/5, Clinical Safety 1/5). Contraindicated nephrotoxic NSAID (Naproxen) in CKD Stage 4 risks acute-on-chronic renal failure; unadjusted Colchicine in severe renal impairment carries high risk of fatal neuromuscular toxicity and pancytopenia. Authored Golden Rewrite recommending a short-course oral Prednisone taper (30–40 mg daily over 7–10 days) or intra-articular corticosteroid injection as safe first-line therapy in eGFR < 30, alongside renal telemetry and uric acid monitoring.

EDUCATION

DEGREE / QUALIFICATION	INSTITUTION	FOCUS & DISTINCTIONS
MSc. in Computer Information Systems	Boston University	Major: Computer Information Systems • Graduated with Honors (2016)
BSc. in Network Security	Derby University	Major: Network Security (GPA: 3.6) • Led cybersecurity protocol project (2015)
Bachelor in Health Science (BHS)	University of the People	Major: Health Science, Community Health, and Epidemiology • Graduated with Honors

MEDICAL LICENSURE & APPLIED DOMAIN FRAMEWORKS

- **Active Medical Licensure:** Licensed General Practitioner (GP) — Medical and Dental Council of Nigeria, Reg. No: **MDCN/R/107127** (Active & Verified).
- **Emergency Triage & Clinical Competency Protocols:** Advanced Cardiac Life Support (ACLS), Pediatric Advanced Life Support (PALS), Basic Life Support (BLS), CPR & AED, Community and Public Health (CPH), Epidemiology, Behavioral Health.
- **Health Informatics, Cybersecurity & Project Governance Frameworks (Applied Domain Training & Standards):** Project Management Professional (PMP) Governance, Certified Ethical Hacker (CEH) Security Methodology, ITIL Service Management, CompTIA A+, Microsoft Systems Engineering (MSCE), Capability Maturity Model (CMM), ISO Quality Compliance, UI/UX Workflow Design.

CONTINUING MEDICAL EDUCATION (CME) & SPECIALIZED CLINICAL FOCUS

- **Diabetes Management & Medical Telemetry:** Integrating Diabetes Technology (Continuous Ketone and Glucose Monitoring Systems) into Primary Care Workflows.
- **Preventive & Specialty Medicine:** Factor XIa Inhibitors in Stroke Prevention, Breast Cancer Care 2025, Autoimmune Disorders (Myasthenia Gravis), Lung Cancer in Scleroderma, Migraine Stigma & Care, Pregnancy Planning & Contraception Counseling.
